ULTIMATE PRE-MOLDED ORTHOTIC

The ULTIMATE Pre-Molded Orthotic design is the culmination of over 22 years of clinical experience and thousands of patient studies. The FRELONIC® composite material provides a high level of support and stability. It is 50% thinner and is lighter in overall weight compared to traditional materials used in orthotics. The ULTIMATE Pre-Molded Orthotic is top covered with CELLFLEX® foam bonded to MICRODRY®, which is a high-tech fabric that is designed to reduce friction and its by-products, heat and moisture. The ULTIMATE Pre-Molded Orthotic is available in three-quarter length, full length, and narrow cut.

The orthotic that provides you with greater comfort and a comfortable fit:

- Greater resistance to pronation
- Reduces pain associated with Plantar Fasciitis
- Excellent arch support
- Moderate heel cup for a comfortable fit
- Biomechanically tested
- Superior shock absorption

MADE IN THE USA
