

Top Cover Options

Leatherette

(Synthetic leather) Standard top cover. Most durable option.

Neoprene

Padded fabric top cover. Provides advanced antimicrobial protection. Decreases odors, moisture absorbing, and quick drying. Available in 1/16" and 1/8".

P-Cell

High-density soft, closed-cell, ethylene vinyl acetate (EVA) foam. It is lightweight, flexible, resilient, and durable. An ideal top cover for diabetic patients with sensitive feet.

EVA (Similar to Ucolite™)

Padded top cover material. Extremely durable, recommended for patients with excessive perspiration and/or slippage. Available in 1/16" and 1/8".

Genuine Leather

Natural material, therefore colorations and markings may vary. Not recommended for patients with excessive perspiration.

Bamboo

Padded fabric top cover embedded with charcoal to create antibacterial properties and decrease odors. Moisture absorbing and quick drying. Offers thermal insulation for improved circulation. Available in 1/8" thickness only.
